### CORPORATE GOVERNANCE MANAGEMENT DISCUSSION AND ANALYSIS

The Discussion contained herein is based on certain secondary and primary research reports coupled with the Company's analysis. Thus, there are certain risks associated with these forward looking statements and the Investors are cautioned regarding the same. These statements are also based on the perceived and actual risks, which arise out of Company's growth plans, existing and future projects, availability of qualified and skilled manpower, dependence on certain businesses and other factors.

### INDUSTRY OVERVIEW

Entertainment and Media (E&M) is one of the fastest growing sectors in India. The sector consists of creation, aggregation and distribution of content, products and services, news and information, advertising and entertainment through various channels and platforms.

The industry is taking initiatives like regional content and distribution platforms (digital, non-digital and mobile) to enhance customer experience as well as monetize content. New technologies such as 3G, broadband and mobile infrastructure are also helping in propelling the growth rate.

The Indian entertainment and media (E&M) industry bounced back in 2010 registering a growth rate of 11 percent compared to mere 1.4 percent in 2009. This growth was primarily driven by the resurgence of media spend by advertiser across media platforms.

For the E&M industry in India, it was also a year that witnessed a shift in favor of digital technologies as DTH touched 28 million net subscribers.

Moreover, India also emerged as the seventh largest global market for social media consumption and as consequence saw greater focus from companies to identify more relevant and personal ways of reaching out and engaging with their target audience.

#### **OPPORTUNITIES AND THREATS**

### **OPPORTUNITIES:**

The Indian entertainment industry is on the threshold of emerging as a large market globally. Future growth of the industry is expected to be led by risingspends on entertainment by a growing Indian middle class, regulatory initiatives, increased corporate investments and the industry's dynamic initiatives to make strategic structural corrections to grow. In addition to the Indian middle class' enhanced spends projected towards entertainment, the rising global interest in Indian content is expected to fuel growth in this industry.

Media spend in India as a percent of GDP is very low percent. This ratio is almost half of the world's average percent and is much lower compared to developed countries like US and Japan. This indicates the potential for growth in spends as the industry in India matures.

Recovery of Indian economy, increase in disposable income at the last mile, lack of affordable outdoor entertain opportunities, ever-growing younger population etc. is expected to influence the Entertain & Media Industry positively.

### THREATS:

The Company operates in highly competitive environment that is subject to innovations, changes and varying levels of resources available to each player in each segment of business. It may not be possible to consistently predict changing audience tastes. People's tastes vary quite rapidly along with the trends and environment they live in. with the kind of investments made in ventures, repeated failures would have an adverse impact on the bottom line of the Company.

On the other hand, the radio sector enjoyed much success during recession. This fact owes to the reason of many advertisers considering a cheaper medium of communication called Radio over more expensive resources like newspapers and televisions.

## OUTLOOK

The Indian economy grew at a faster pace in 2010 compared to 2009, which translated into more advertising as well consumer spending. This high growth rate will continue to remain in 2011 as well. The Indian advertising industry will grow by 17 per cent in calendar year 2011 and is expected to add about US\$ 889 million to the existing ad pie worth US\$ 5248 million, according to Pitch Madison Media Advertising Outlook 2011. This robust growth in advertising industry will benefit the M&E industry in 2011 as well.

The entertainment industry in India is estimated at about US\$ 9.4 billion in revenues in year 2010, which is expected to grow at a rate of 14.1 per cent to reach revenues of US\$ 10.7 billion in 2011.

Management is optimistic about the sustainable business opportunities in the financial year 2011-2012 on the back of positive macro economic factors, robust content pipeline and so on. Future outlook for the next financial year is Positive and barring the unforeseen circumstances the company's performance is expected to show growth.

## **RISK MANAGEMENT**

#### A. Internal

The Market are getting increasingly competitive, Technological obsolescence and lack of skilled & trained human resources demand sustained and enhanced levels of investment in both depreciating as well as appreciating assets but company will formulate favorable policy to overcome the problem.

B. External

Advancement of the technology for creation of the content is necessary with the new technologies being adopted by the competitors. The business may have a positive or a negative impact on the revenues in futures due to changes in the Regulatory framework and tax law as compared to the current scenario.

Management continuously monitors and makes efforts to arrest decline or adverse Output on any of these factors.
